# Physical entry flows to Finland in 2020

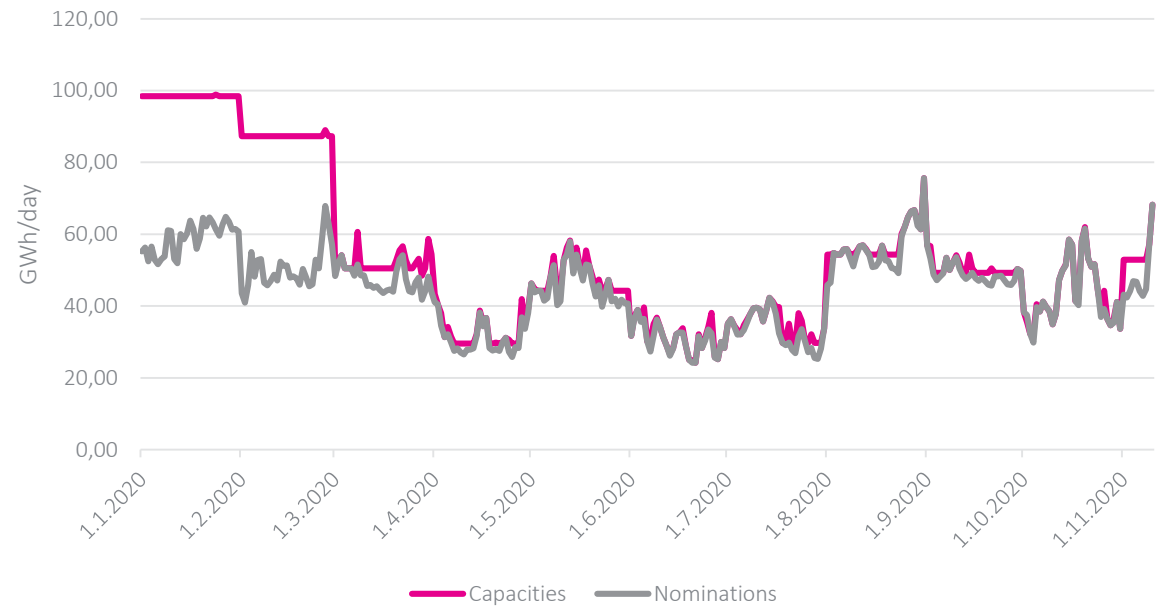

There are 6 biogas production plants connected to Finnish gas network. Biogas injection to the Finnish gas system in 2020  $\approx$  100 GWh (excluded from the data above)

# Balticconnector and Imatra (capacity and initial nominations)

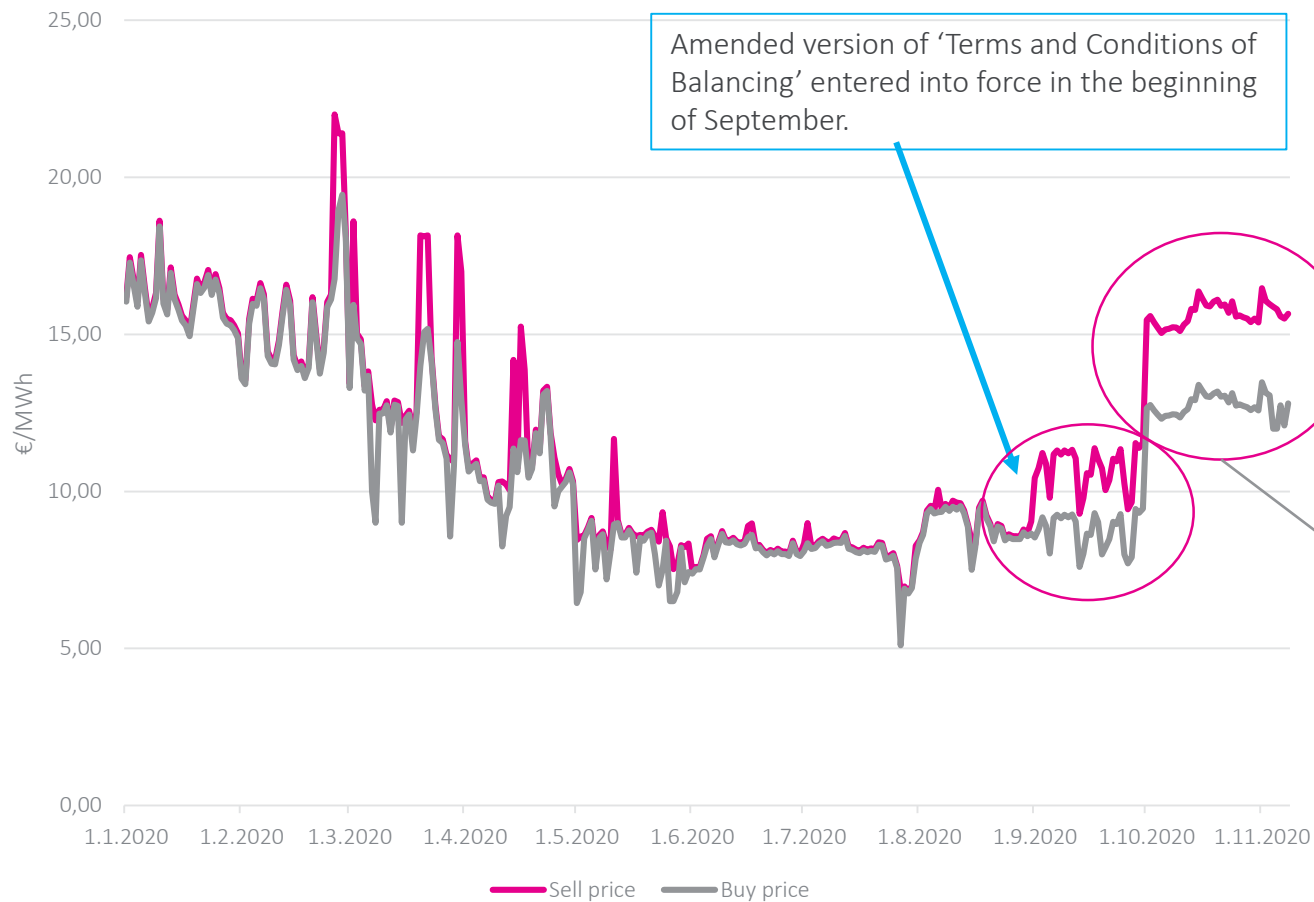

## Balticconnector

## Imatra

# Balance gas buy and sell prices

- Sell price of balance gas is the price at which TSO sells balance gas for BRP in order to neutralize the commercial imbalance.
- Buy price of balance gas is the price at which the TSO buys the 'excess' gas from BRP in order to neutralize the commercial imbalance.

Price level increased during the time of increased nominations at BC. The difference between sell and buy prices is caused by +/- (sell/buy) marginal to the GET Baltic price index.

# Tasekaasun päiväkohtaiset netotetut osto-/myyntimäärät

Jotta kukin Suomen markkinassa toimiva tasevastaava on tasapainossa kunkin kaasupäivän jälkeen, TSO joko ostaa tai myy kaasua tasekaasun osto- ja myyntihintaan.

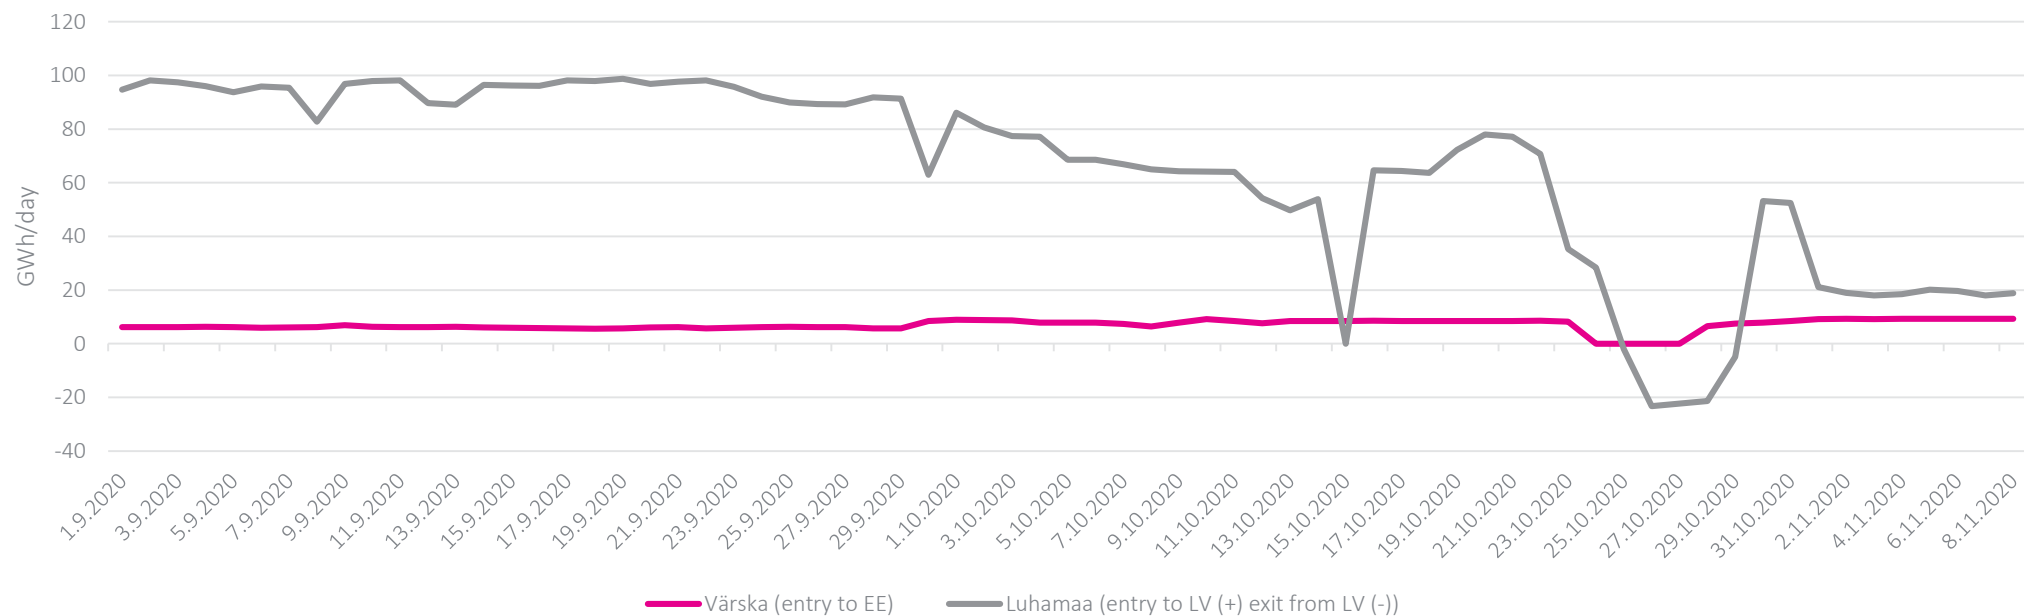

Positiivinen lukuarvo tarkoittaa sitä, että kaasua on syötetty kaasujärjestelmään enemmän kuin otettu. Ts. Olemme ostaneet toimijoilta kyseisen määrän kaasua enemmän kuin myyneet.

# Lithuanian cross-border entry and exit physical flows

Not any physical flows from EE-LV market area to LT market, only occasional commercial flows.  
Kiemenai flows very small during the time of Incukalns withdrawal season.

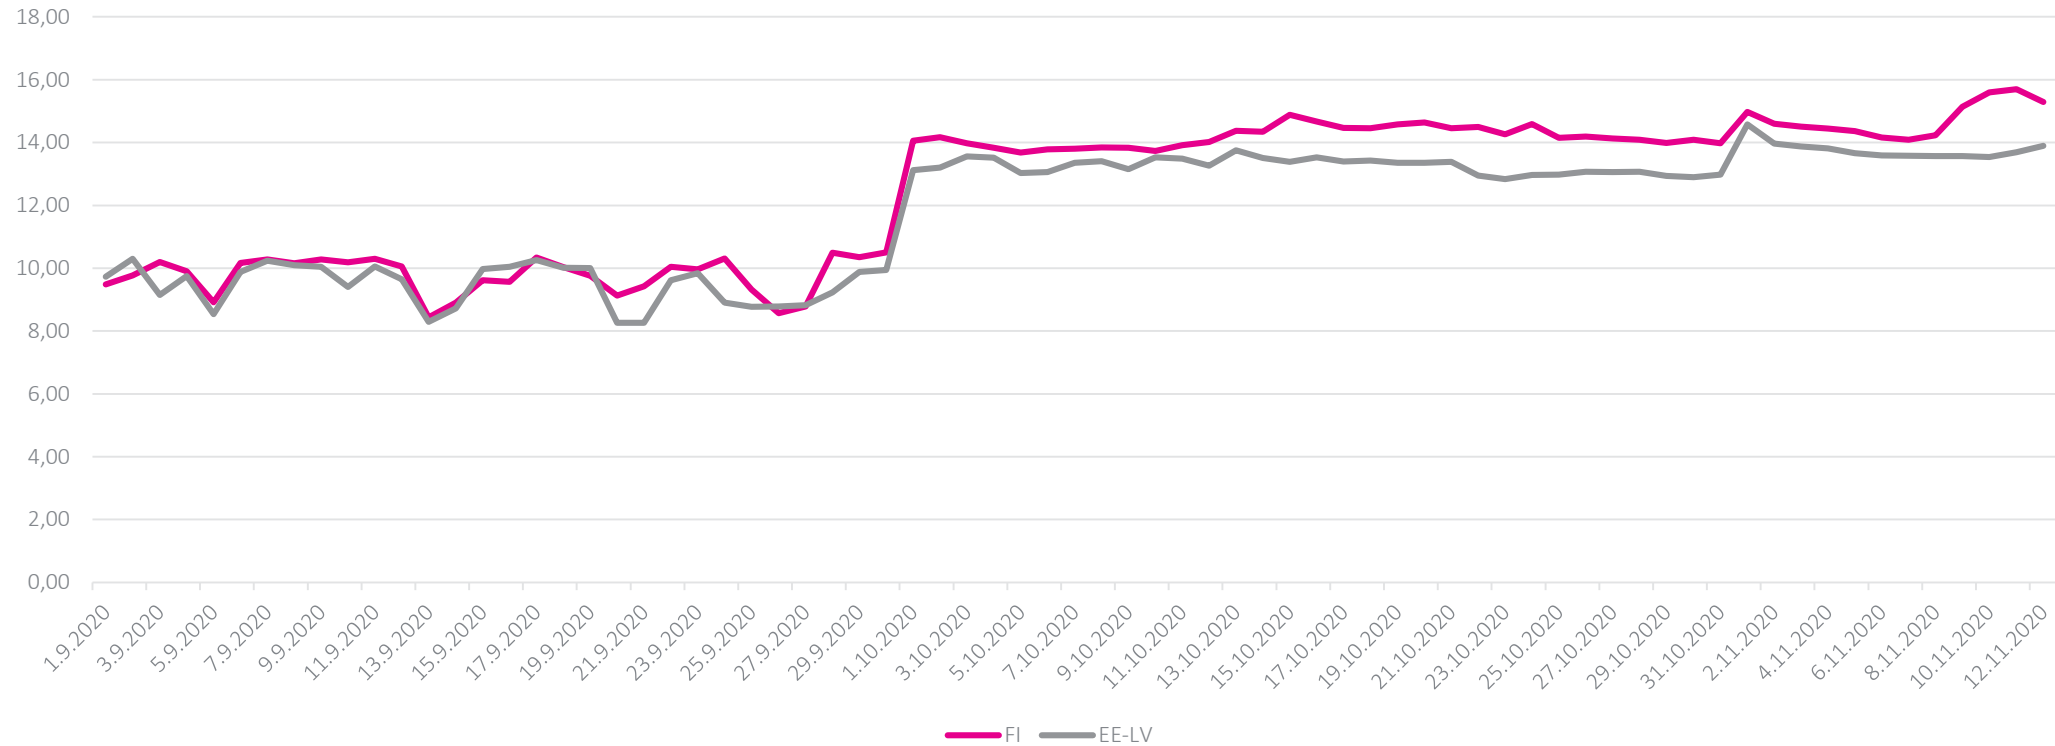

# Cross-border flows from Russia to EE-LV market

Only minor quantities flowing to EE-LV market area through Värskä entry point.

At Luhamaa point, some flows from EE-LV market area to Russia.

# Get Baltic index

Lokakuun hinnannousu Länsi-Euroopan hintatason noususta?

Lokakuussa Suomen ja Viro-Latvia-markkinan aiempaa suurempi hintaero selittynee BC:n ruuhakisuudella.
