

## Gasgrid Finland's memberships and commitments

Membership (associations, organisations)	Grounds for being involved
Finnish energy	Collective agreements, monitoring of energy sector regulations and stakeholder collaboration
ENTSOG	Collaboration and sharing of information between gas transmission system operators at EU level
Finnish Packaging Recycling RINKI Ltd	Statutory obligation concerning the responsibility of a packaging manufacturer. Government decree concerning packaging and packaging waste (518/2014)
Gas Association	The basic task of the Association is to promote the operating conditions of the gas sector, as well as to develop and maintain skills and expertise in the gas sector
Marcogaz	A representative association operating in Europe, a developer of technical gas solutions, taking standards and regulation amendment needs into consideration. Promotes Gasgrid's networking in the gas sector's technical operator base.
The natural gas section of the Finnish National Emergency Supply Agency's oil pool	The national emergency supply organisation is a network that maintains and enhances the security of supply in Finland under a public - private partnership principle. Its main objective is to secure the operating conditions of organisations that are important from the perspective of security of supply and as a result, to secure the operating conditions of the entire society. Gasgrid has been invited to join as a full member to bring the perspective of a gas transmission system operator to the development of the sector.
CLC Climate Leadership Council	A non-profit climate-business network that develops corporate-driven solutions for climate change. Gasgrid brings special expertise in the gas sector and develops practical solutions to challenges in collaboration with others.
Energemi	Sickness insurance fund for employees
European Hydrogen Backbone	A European open initiative with the purpose of influencing EU decision-makers and investigating the possibilities of clean hydrogen, particularly from the perspective of transmission system operators. Gasgrid is involved to bring Finland onto the "hydrogen network map"
