

GASGRID 

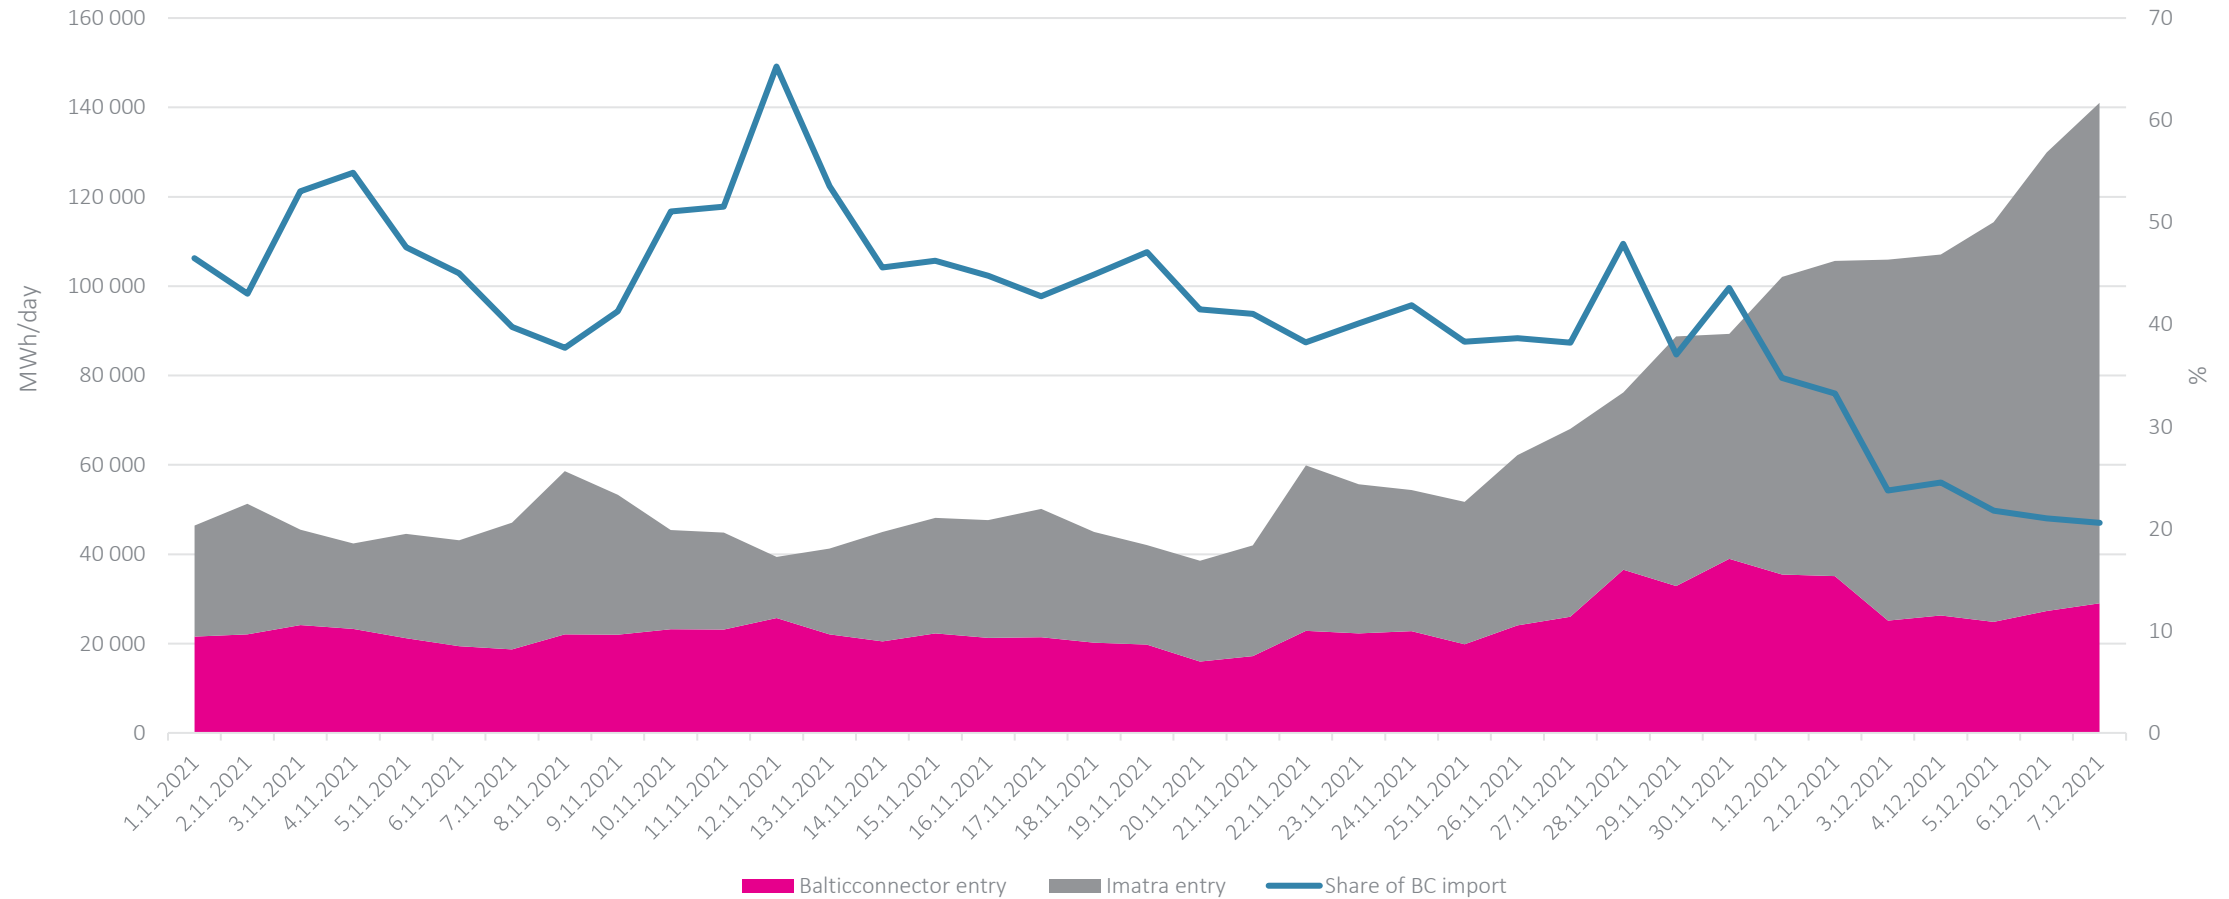

# Overview

- 1) Gas consumption in November was app. 1,6 TWh (in November 2020 app. 2,2 TWh).
- 2) In the beginning of December, Finnish gas consumption exceeded 140 GWh/day despite the high gas energy prices.
- 3) Cumulative gas consumption 1.1.-30.11.2021 app. 22,3 TWh

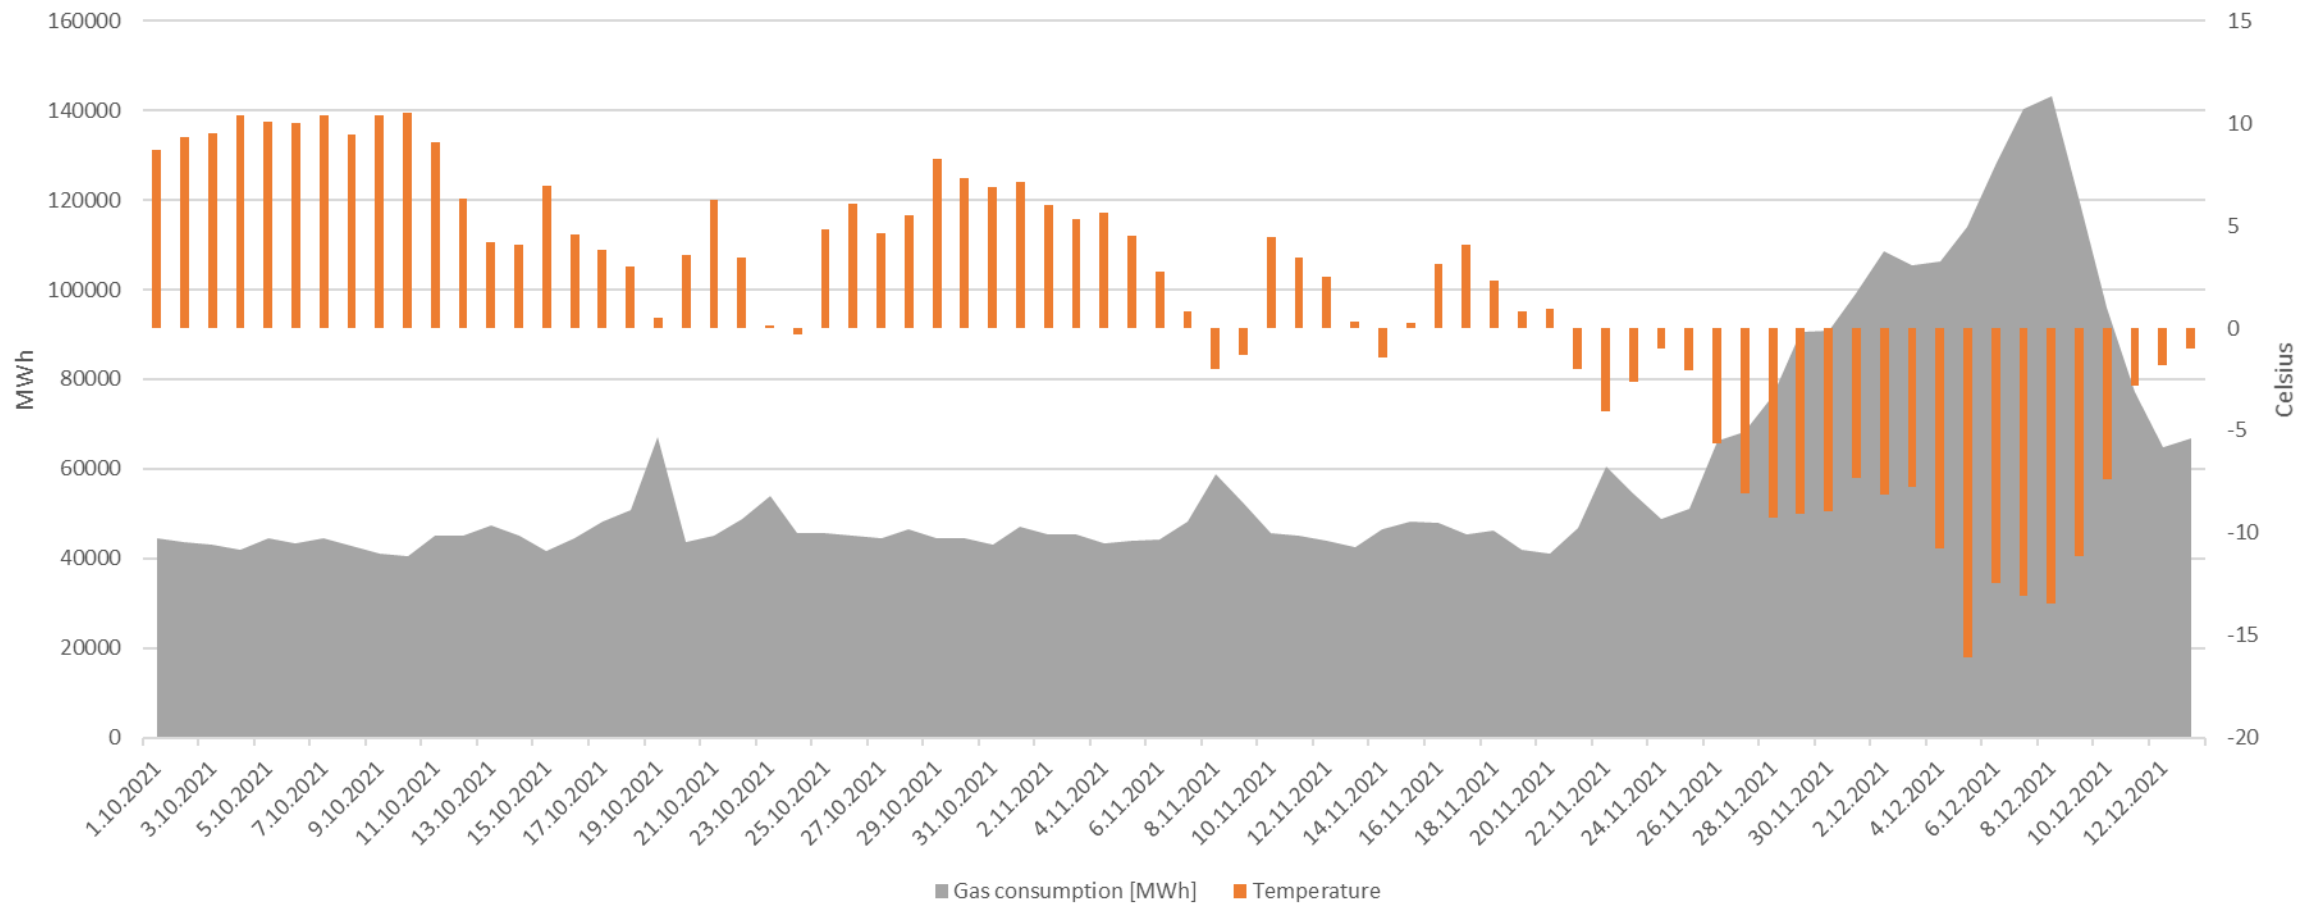

# Physical entry quantities to the Finnish gas system

After the start of the cold period at the end of November, imports from Imatra increased significantly.

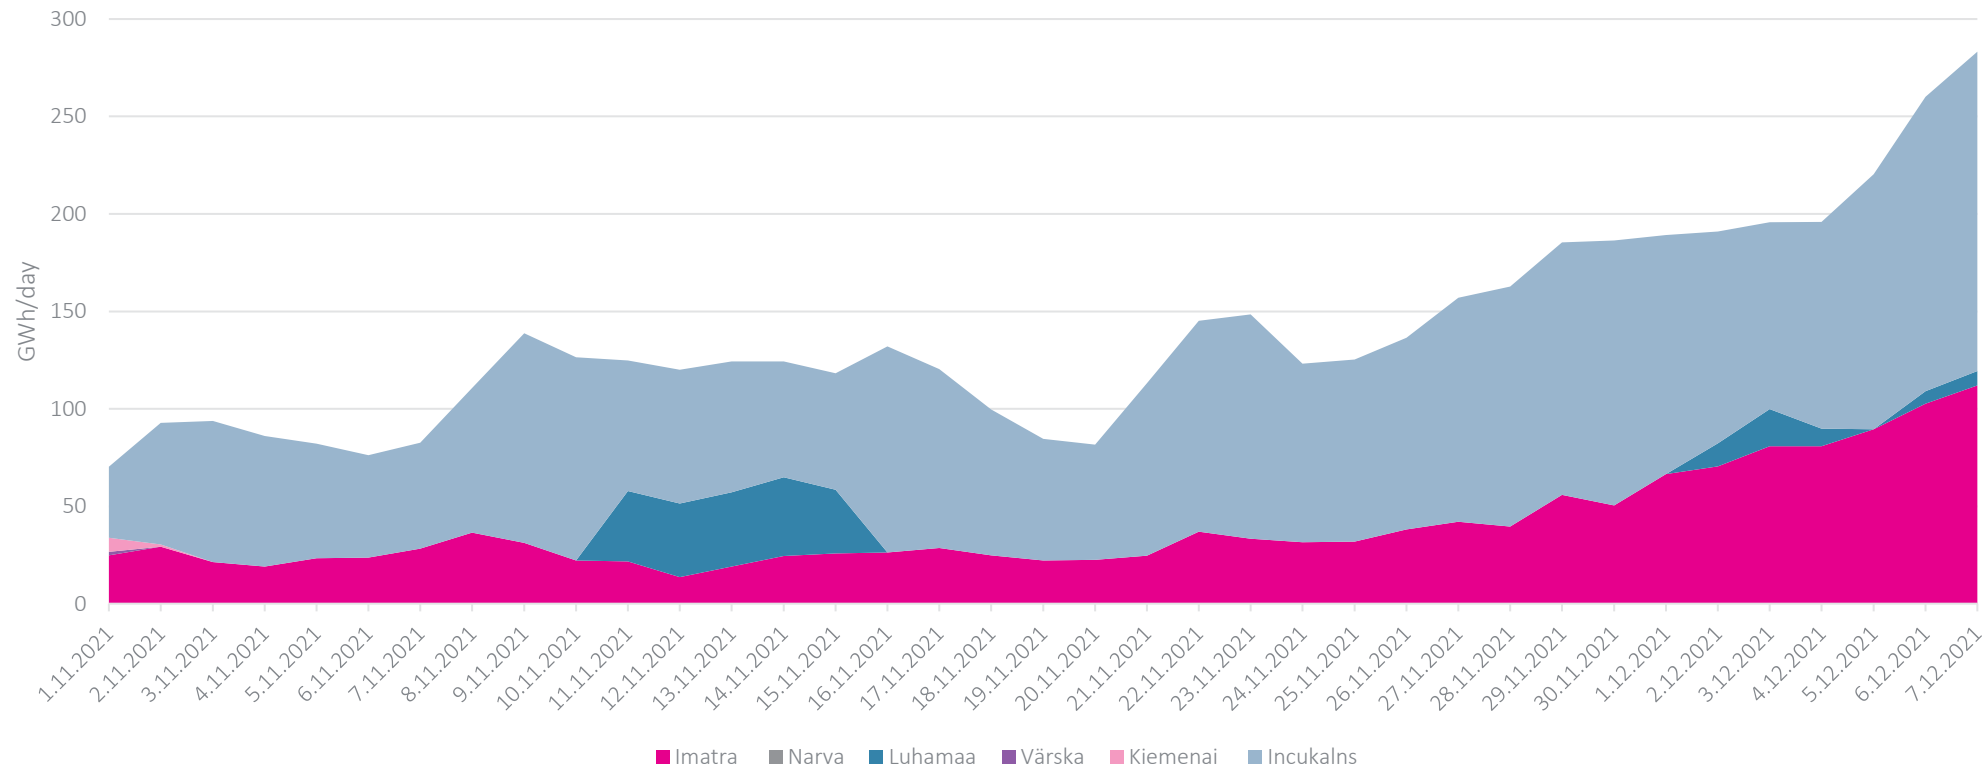

# Effect of temperature on gas consumption

# Physical quantities of gas supplied to the FINESTLAT\* common entry tariff zone

\*FINESTLAT = Finnish-Estonian-Latvian

Major part of gas has been imported to the FINESTLAT zone from Imatra entry point and Incukalns gas storage in November-December.
