

GASGRID 

# Gas consumption and transmission services

- Gas consumption in June 2022 app. 0,8 TWh (in June 2021 app. 1,3 TWh). Cumulative gas consumption 1.1.-30.6.2022 app. 7,4 TWh (1.1.-30.6.2021 app. 14,8 TWh)
- Highest daily consumption in June was on 6th of June  $\approx$  31,5 GWh/day.

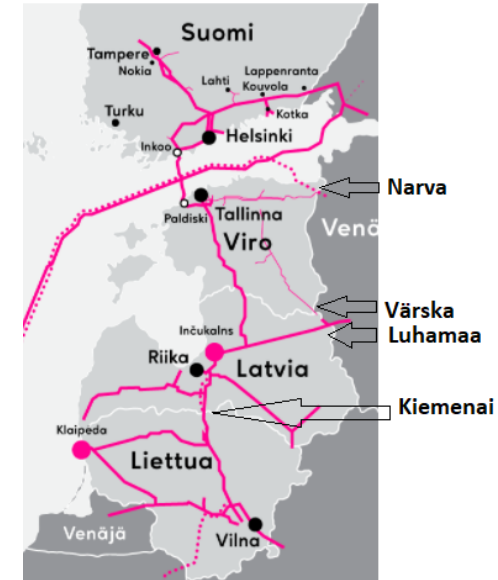

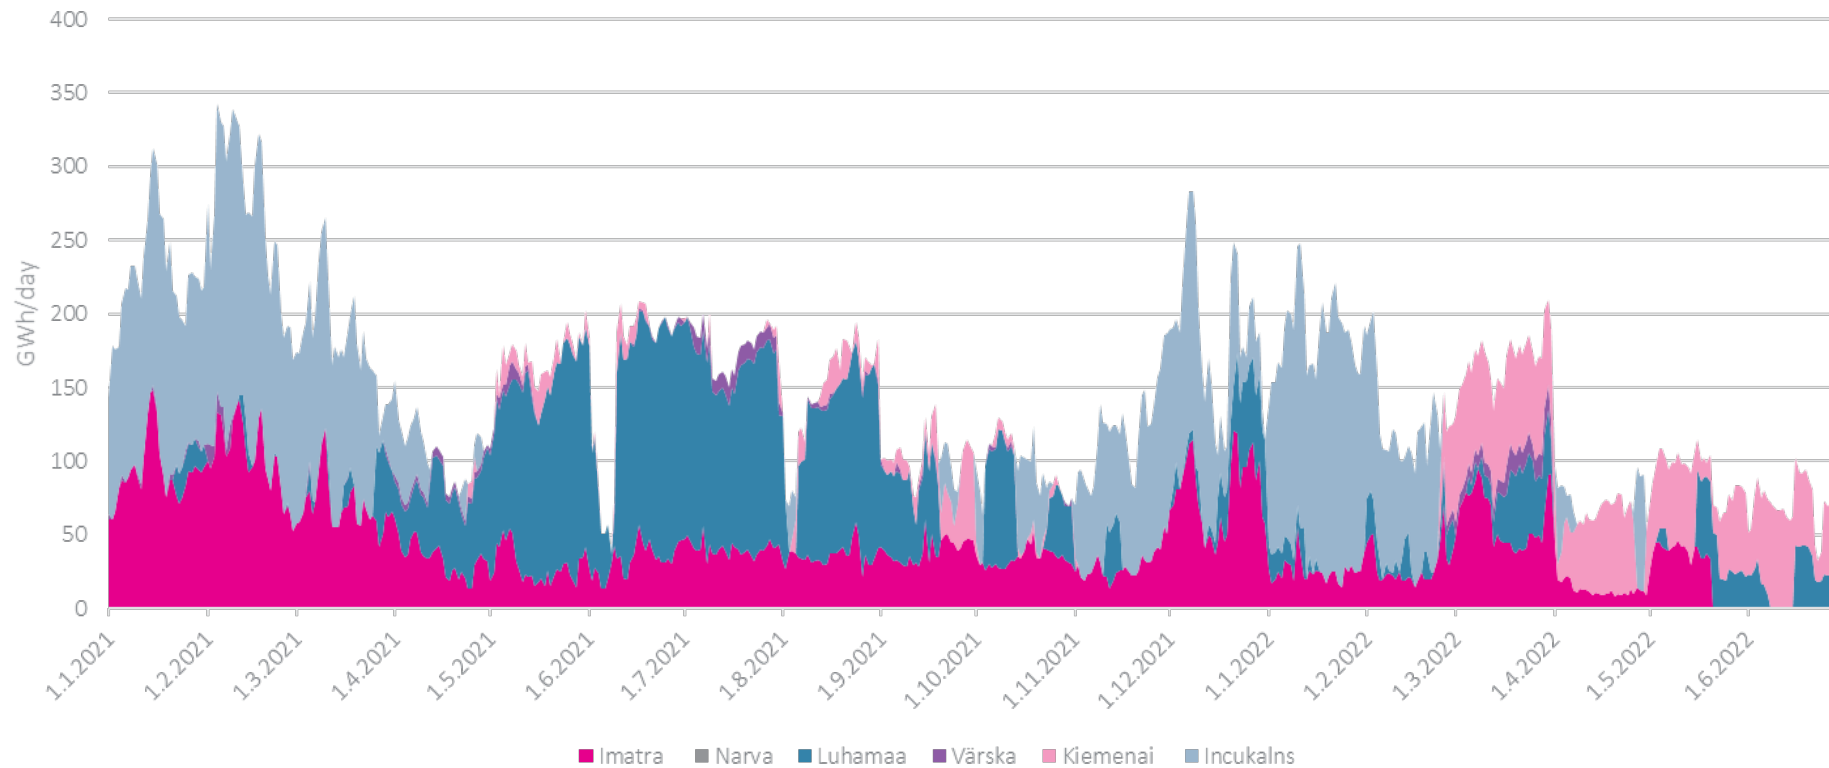

Gas consumption 2020-2022

Note: Energy values in the material based on Gross Calorific Value (GCV)

# Gas imports to FINESTLAT regional entry tariff zone

- Starting from the end of February, gas deliveries to FINESTLAT region through Kiemenai from Lithuania to Latvia have played important role.
- When looking at the data it should be considered that all quantity is not consumed by final consumers, but part of gas is injected to Incukalns gas storage. Detailed data on Incukalns storage injections and withdrawals can be found here: <https://agsi.gie.eu/#/>
