

Updated 14.2.2024

Membership (associations, organisations)	Reasons for involvement
Finnish Energy	Collective agreements, monitoring of energy sector regulation and stakeholder cooperation
ENTSO-G	Cooperation and access to information between gas transmission system operators at EU level
Finnish Packaging Recycling RINKI Ltd	Statutory obligation on producer responsibility for packaging, Government decree on packaging and packaging waste (518/2014)
Finnish Gas Association	The Association's mission is to promote the operating conditions of the gas sector and to develop and maintain expertise and knowledge in the gas sector
Marcogaz	Represents the European gas industry on all technical aspects of the gas system's value chain taking into account standards and the need for regulatory changes. Promotes Gasgrid's networking with technical operators in the gas industry.
Pipeline operators forum (POF)	A community of transmission pipeline operators and integrity engineers to exchange experiences and ideas, with the ultimate purpose of developing common policies and practices to improve the safety and availability of pipelines.
EGIG	EGIG is a co-operation between a group of eighteen major gas transmission system operators in Europe that collects data on leakage damage to transmission pipelines. Gasgrid is a participating company in order to compare data with other operators. EGIG regularly compiles a report on transmission pipeline damage that has caused a leak.
European Compression Community (E2C)	In the E2C Community, information is exchanged between European gas transmission companies, mainly in relation to compressor stations. In addition to technical matters, the exchange of information also covers good practices related to the reduction of methane emissions, for example
Natural gas division of the oil pool of the National Emergency Supply Agency	The National Emergency Supply Organisation is a network that maintains and develops security of supply in Finland on the principle of public-private partnership. Its main objective is to secure the operating conditions of organisations important for security of supply and thus for society as a whole. Gasgrid has been invited as a full member to bring the perspective of the gas transmission system operator to the development of the sector.
CLC Climate Leadership Council	A non-profit climate business network that develops business-oriented solutions to climate change. Gasgrid brings special expertise in the gas sector and develops practical solutions to challenges in cooperation with others.
Enerkemi	Employees' health insurance fund
European Hydrogen Backbone	A European open initiative aimed at influencing EU decision-makers and exploring the potential of clean hydrogen, especially from the perspective of transmission system operators. Gasgrid is involved in putting Finland on the "hydrogen infrastructure map"
FIBS ry	FIBS (Finnish Business & Society) is the largest corporate responsibility network in the Nordic countries and supports Gasgrid's sustainability work and role as an active developer of responsible business.
H2 Cluster Finland	A business-driven national hydrogen cluster has been established to accelerate the hydrogen economy and the export of hydrogen-related solutions. The hydrogen cluster is a network of companies that promotes information sharing, cooperation and business development related to the hydrogen economy and the transition to carbon neutrality. The network supports Gasgrid's development work related to diverse gases and its role as an active developer.
AIB - Association of Issuing Bodies	A European Association of registrars of guarantee of origin registers that develops and promotes a standardised European Energy Certificate System (EACS) to ensure uniform, reliable guarantees of origin that are electronically transferred between countries via AIB's Hub.
Energy sector information sharing group E-ISAC	ISAC=Information Sharing and Analysis Centres are cooperation bodies for cybersecurity. The functioning of critical infrastructure requires close cooperation. Even though cyberthreats are increasing, the continuity of energy production and distribution can be ensured as long as the operations and practices of the sector are secure. The Energy sector information sharing group E-ISAC consists of Finnish energy sector operators. The participants represent, among other things, energy production and its transmission. Members of the E-ISAC group have been involved in various projects producing materials for the protection of critical infrastructure.
EGN sustainability group 1	Executives' Global Network to create networks and identify best practices in sustainability.
KIWA HSEQ network in supplier audits	Gasgrid Finland operates responsibly and ethically, and we require our suppliers to act similarly responsibly. Gasgrid wants to utilise the network's expertise and develop our own expertise in supplier audits.
Global Compact	The UN Global Compact is the world's largest corporate responsibility initiative. Companies participating in the initiative are committed to complying with international obligations relating to labour, human rights, environment and anti-corruption. The Global Compact provides information, support, training and tools for responsible and successful business activities.
World Energy Council (WEC)	The association promotes the development of the Finnish energy sector through cooperation between representatives of different forms of energy and other stakeholders.
European pipeline research group (EPRG)	The organisation deals with issues of common interest related to the technical integrity of oil and gas transmission pipelines in the areas of pipeline manufacturing, pipeline design, construction, operation and maintenance.
